

# XXVI VIRTUAL BIENNIAL CONFERENCE ON DISEASES OF THE VULVA & VAGINA September 23 - 25, 2021

**Learning Objectives:** Upon completion of this course, participants will be able to:

- Describe how to submit vulvovaginal specimens for pathologic analysis
- Communicate with their consulting pathologist in a meaningful way
- Formulate a differential diagnosis for common patch and plaque-based conditions on the vulva
- Formulate a basic management plan for specific dermatoses of the vulva including lichen simplex chronicus, contact dermatitis, and lichen sclerosus
- Engage in a basic discussion with patients on incontinence and its impact on vulvovaginal conditions
- Explain in simple language what patch testing is and identify common vulvar allergens
- Recognize important vulvovaginal disorders that might present in an inpatient setting
- Explain the benefits of a multidisciplinary clinical care team for treating vulvodynia
- Formulate a differential diagnosis of erosive and ulcerative conditions on the vulva
- Formulate a basic management plan for specific erosive and ulcerative conditions on the vulva
- Describe the varied clinical presentation of Graft versus Host Disease (GVHD) and provide treatment recommendations for GVHD
- Brainstorm systems-based techniques to improve vulvovaginal care in all skin types
- Identify systems-based and clinic-based approaches to optimizing vulvovaginal care for transgender patients
- Describe optimal physical exam techniques and management pearls for pediatric patients with vulvar conditions
- Compare and contrast unique aspects of vulvovaginal care within different health care delivery systems and settings (i.e. national health service, academic center, and private practice settings)
- List a differential diagnosis of neoplasms on the vulva
- Formulate a basic management plan for specific neoplasms on the vulva
- List specific neoplasms that may be treated with Mohs micrographic surgery and understand when a referral to a Mohs surgeon may be appropriate for specific vulvar neoplasms
- Compare and contrast current treatments for genitourinary syndrome of menopause including laser
- List and describe the steps to performing and interpreting a vaginal wet mount
- List important conditions that present as vaginitis
- Formulate a basic management plan for specific causes of vaginitis including trichomoniasis, desquamative inflammatory vaginitis, and non-albicans candida vulvovaginitis

**INTERNATIONAL SOCIETY FOR THE STUDY OF VULVOVAGINAL DISEASE**
